## Energy Efficiency Rebate Programs

Midwest Electric's Commercial & Industrial (C&I) Rebate Programs offer member businesses rebate incentives for specific energy efficiency measures.

**C&I Lighting Rebate Program** helps replace inefficient internal lighting at member business facilities. This program provides a rebate based upon the number of lamp watts reduced when replacing old lighting with new, energy-efficient lighting. Members are eligible for the rebate when specifications are met.

**C&I Energy Audit Rebate Program** offers member businesses funding for the completion of professional energy audits. Energy audits help identify potential areas to save energy and money. Additional rebates are available for businesses that install energy efficiency improvements recommended by the audit.

**C&I Improvements Rebate Program** promotes the value of energy efficiency by funding the purchase of specific energy-efficient equipment for member businesses. Eligible equipment includes electric chillers, high-efficiency air compressors with variable frequency drives, high-efficiency motors, high-efficiency battery chargers, LED lighting with sensors for refrigerated cases, occupancy sensors/controls for LED lighting, occupancy sensors/controls for HVAC, open refrigerated case door retrofits, and variable frequency drives for HVAC.
