Program Overview

The goal of the Midwest Electric Revolving Loan Fund (RLF) is to create or retain jobs in west-central Ohio. Any local business within the seven-county area that we serve is eligible to apply for a low-interest loan.

Financing is available to purchase land, buildings, manufacturing equipment, office and work equipment, and for infrastructure improvements. Ineligible RLF projects include: refinancing of existing debt, or payment to business owners/partners; purchase of an existing business (unless it also includes growth and expansion); projects without any supplemental financing; investments; general improvement loans for normal replacements (unrelated to expansion/creation); agricultural production cost (ie, cultivation, production, harvesting); general purpose vehicles; working capital; individual residential construction projects; conflict of interest; etc.

The project must have a minimum of 10% equity infusion.

Call 800-962-3830 for more information or a free pre-application.
