

Midwest Electric, Inc.

A Touchstone Energy® Cooperative 

Dear Member:

The mission for Midwest Electric is to provide our member-owners with reliable electricity, superior customer service, innovative energy solutions and competitive prices.

Midwest Electric has contracted with Fitzwater Tree and Lawn Care to provide tree pruning in your area. Directional pruning allows the natural defenses of the tree to protect against decay and disease. Directional pruning is based upon Ohio Department of Forestry guidelines. Branches are removed at the joint of a limb. Cuts are made where a tree would likely lose a branch due to natural conditions.

Please contact Matt Donaldson at 800-962-3830 with any tree related questions. Midwest Electric will review tree removal requests. Free wood chips are available upon request.

Thank you for allowing Midwest Electric to prune trees that could contact our electric power lines.

Sincerely,
Paul Rogers
Manager, Engineering and Operations
